## MASPORT BOLDLY GOES WHERE SOME OTHERS CAN'T

Australia's terrain can be tough, but tackling it is now easy thanks to Masport's new range of ride on mowers that can handle almost anything that's thrown at them.

The new Crossjet ride on mowers are the perfect solution for neglected areas, where new unmowed areas require breaking in or on challenging ground such as on slopes and wet conditions where it's difficult to get good traction. These mowers offer better stability and traction than traditional ride on mowers because they have a low centre of gravity with superior weight distribution.

Quality and performance is enhanced with a strong and rugged chassis and a steering system that operates with absolute ease and directness, allowing the user to turn quickly and precisely, providing great manoeuvrability around trees and tight areas. Add to that a Tuff Torq hydrostatic transaxle transmission, two swing back blades made from hardened and tempered steel, plus a genuine Vanguard Briggs & Stratton commercial grade engine and the result is a ride on mower offering uncompromising reliability.

Masport's Crossjet range has been designed with safety in mind, featuring a barrier roll bar, front and rear bumpers, an on-demand differential lock that increases traction when the foot pedal is depressed and agricultural style V tread tyres that will grip in almost any condition – sandy, wet or dry.

And for those who spend a long time in the saddle, comfort is provided by cushioned high back seat with suspension springs and seat adjustments.

Available in heavy duty 2WD and 4WD configurations, both models come with comprehensive commercial and domestic warranties. The Crossjet mowers are priced at RRP \$9,495 for the 2WD and RRP \$13,495 for the 4WD. For more information and stockists visit [www.masport.com.au](http://www.masport.com.au) or call 1300 366 225.

### NOTES TO EDITORS:

#### Masport Crossjet 2WD Specifications

- Powered by Briggs & Stratton Vanguard 20 HP 2-cylinder engine
- Tuff Torq K-62M hydrostatic transaxle transmission
- Diff-lock
- 0-9 kmh forward speed
- 920mm (36") heavy duty steel deck
- EI – mag deck engagement
- HD twin flail on solid bar cutting system
- 6500m<sup>2</sup>/h cutting time
- V-shaped tread – 405mm (16") front and 505mm (20") rear wheels
- Mulching capabilities
- Hour meter - key an seat activated
- Roll bar protection, front and back bumpers
- Halogen and LED lights
- 14 litre fuel tank
- Tow hitch
- Cruise control
- 231 x 105 x 151 - (317kg)

#### Masport Crossjet 4WD Specifications

- Powered by Briggs & Stratton Vanguard 23 HP 2-cylinder engine
- Transmission with diff lock. Rear – Tuff Torq K-664 hydrostatic transaxle. Front – Kanzaki KXH 10 transaxle
- Diff-lock
- 0-8 kmh forward speed
- 920mm heavy duty steel deck
- EI – mag deck engagement
- HD twin flail on solid bar cutting system
- 6500m<sup>2</sup>/h cutting time
- V-shaped tread – 405mm (16") front and 505mm (20") rear wheels
- Mulching capabilities
- Hour meter - key an seat activated
- Roll bar protection, front and back bumpers
- Halogen and LED lights
- 14 litre fuel tank
- Tow hitch
- Cruise control
- 231 x 105 x 151 - (350kg)
